I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation)

ABOUT ME

"Currently, I am finishing my second year and studying Computer Science at University of Economics and Human Sciences in Warsaw. I want to develop my Front-end skills further. I am a quick learner under the pressure." Below I have provided two of my projects. I have many small projects so please feel free to check my GitHub page.

EXPERIENCE

Intern Front-end Developer | Itransition

📅 April 2022 - Ongoing

📍 Warsaw, Poland

- Multi-tasked across multiple functions and roles to meet deadlines and organizational expectations
- Learned front-end object-oriented programming to develop client server systems
- Gained the first experience in a programming field to know more about the programmer's life
- Coded websites using HTML, CSS, JavaScript languages

Data Specialist | Linklaters

📅 March 2021 - April 2022

📍 Warsaw, Poland

- Validated incoming data against quality standards to eliminate irrelevant or unusable information to keep the CRM / Database clear with the necessary data
- Reviewed and updated client correspondence files and database information to maintain accurate records
- Cleaned up and backed up data integrity during extraction, manipulation and processing

EDUCATION

Bachelor's degree in Computer Science | University of Economics and Human Sciences in Warsaw

📅 October 2020 - Ongoing

📍 Warsaw, Poland

PROJECTS

Portfolio | 🌐 | 🌐

- A responsive portfolio sample which shows the main page, navbar, contact section, about section, and gallery. There are some functionalities such as: User can write an email, call directly from contact section, and be in touch through social media. The font animation was built in JavaScript

React Registration App | |

- In this application, I created a registration app where the user can register themselves into system and can login to it. Once the user logs in, there they can block, delete, save themselves inside there. If the user is not in the system / database, there comes a pop up stating "the email doesn't exist". I used MongoDB as well when it comes to storing the data. The application can be updated with a better changes. the deployment was done through heroku. Feel free to register and login :)
